Rishabh Dubey

Software Engineer

Portfolio: rishabdubeydev.com
github.com/RishabhdubeyCS
linkedin.com/in/ rishabh-dubey-3

SKILLS

Languages & Frameworks	JavaScript, TypeScript, OOPS, Multithreading, , REST API, Microservices, WebSocket, Socket.IO, React.js, Next.js, Node.js
Databases & Technologies	MySQL, MongoDB, NoSQL, , Redis, Database Design, Query Optimization, Data Modeling, ETL Pipelines
Cloud & DevOps	AWS (EC2, VPC, S3, EKS, ECS, RDS, Lambda and etc.), Docker, Kubernetes, CI/CD, Git, GitHub, , Container Orchestration, Auto-scaling, Load Balancing
Methodologies	System Design, Distributed Systems ,API Design, Design Patterns, Code Review, Performance Optimization, Monitoring & Logging

(Academic & Personal Projects)

Steam Talk – Real-Time Community Platform **01/2025**

Technologies: *Next.js, React, Stream Chat, Clerk, Tailwind CSS, Three.js, Framer Motion*

- Built a **scalable real-time web application** for dynamic community engagement and live discussions by integrating **Stream Chat APIs** for channel-based messaging and **real-time communication**. Implemented **secure authentication and authorization** using Clerk with robust **session management**. Designed an immersive, high-performance user interface with **interactive 3D visuals**, animations, and **responsive design** to enhance user engagement. Developed **dynamic routing** and a **modular component-based architecture** using Next.js App Router to ensure **scalability, maintainability, and clean code practices**. Optimized application performance using **efficient rendering techniques (SSR/CSR)**, improving **load time, responsiveness, and overall user experience**.

Next.js 16 Advanced Architecture Showcase (Learning Hub Project)

Technologies: *Next.js 16, React 19, TypeScript, Tailwind CSS, shadcn ui, Radix UI*

- Built Architected a **modular and scalable web application** leveraging advanced **Next.js 16 App Router architecture**, including **nested layouts**, **dynamic routing ([slug])**, and well-structured code organization using private modules. Implemented **hybrid rendering (Server and Client Components)** to maximize **performance, SEO, and bundle efficiency**. Engineered a dynamic blog system using **Static Site Generation (SSG)** with robust **loading and error boundaries** to deliver a seamless user experience. Designed **server-side search and filtering** with **URL-driven state management** using modern Next.js navigation patterns. Developed **RESTful API endpoints** via Route Handlers to handle **data fetching and backend logic** efficiently. Built a **responsive and accessible UI** using Tailwind CSS and shadcn/ui, and optimized media delivery with the **Next.js Image component** to improve **loading performance and user experience**.

Object Detection Dashboard – Real-Time Web App

Technologies: React.js, TensorFlow.js, Coco-SSD, WebGL, HTML Canvas

- Engineered a **real-time object detection system** using TensorFlow.js and Coco-SSD, enabling **client-side ML inference** in the browser. Implemented **webcam-based multi-object detection** with a canvas rendering pipeline for bounding boxes and confidence scores. Optimized performance using **WebGL acceleration** to achieve **low-latency inference (~5 FPS)**, while applying filtering techniques to improve accuracy. Built a **responsive UI** with real-time updates and efficient state management, delivering a **scalable, high-performance AI application**.

Mini-WhatsApp – RESTful Messaging Application (CRUD Project)

Technologies: Node.js, Express.js, MongoDB, Mongoose, EJS, Bootstrap

- Developed a **server-side messaging application** using Node.js, Express, and MongoDB following **RESTful API and CRUD architecture**. Implemented **RESTful routes (GET, POST, PATCH, DELETE)** with Mongoose for efficient data modeling and database operations. Built a dynamic UI using EJS and Bootstrap with middleware support (method-override, centralized error handling). Applied **MVC architecture** and utilized Git/GitHub for version control and project management.

Education

Bachelor of Technology in Computer Science Engineering, *Sage University - Bhopal, India* 2022 — 2027 *Cloud Computing Specialization Current* CGPA: 7.22/10.0

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems (DBMS), Computer Networks, Software Engineering, Cloud Computing

CERTIFICATIONS & INDUSTRY EXPOSURE

- AI For All – Intel & CBSE (2025): Foundations of Artificial Intelligence & Responsible AI
- Deloitte Technology Job Simulation (2025): Real-world coding and problem-solving tasks
- Google Cloud – Introduction to Generative AI Studio (2025)
- Generative AI Workshop – NxtWave (IIT Delhi–Led, 2024)
- Strong interest in Full Stack Development, with hands-on experience building end-to-end web applications using the MERN stack
